

DIGITAL RETINAL PHOTOGRAPHY

Powered by Nikon™ & Topcon

Our state-of-the-art 6 mega pixel retinal camera enables accurate monitoring of the health of your eyes

Retinal photography is included as standard in our private eye examination

An example of a healthy eye recorded by our digital camera

Ideal for patients who are concerned about Glaucoma, Diabetes and Macular Degeneration

A low level flash and non-contact equipment ensures the photograph is safe, comfortable and quick

All NHS patient have the opportunity to include retinal photography for a small additional charge
