

# THE CLAMP EYE EXAMINATION

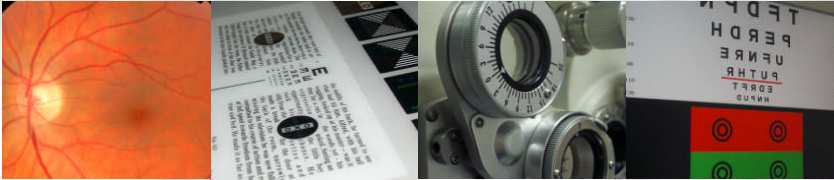

This private 30-minute consultation and discussion is a personalised examination designed to give your eyes the care and attention they deserve to ensure your total peace of mind

## EXAMINATION SUMMARY

Digital retinal photography using a top of the range Nikon camera with full integration of your photographs into your clinical records

Fully qualified professional staff carry out every part of the eye examination including the glaucoma checks

We listen to your needs, and focus your eye examination around the reason for your visit

This will include:

Discussion of your eyesight history and general health

An assessment of the health of your eyes, examining its internal and external structures using a slit lamp microscope and an ophthalmoscope to look for signs of eye disease

Check your current glasses

Perform tests to determine your best vision to improve your near, intermediate and distance vision

Test how well your eyes work together with binocular tests and prescribe exercises if necessary

Glaucoma checks if appropriate, which include assessing your optic nerve head, checking the pressure inside your eye and your visual field

A consultation with a qualified dispensing optician after your eye examination to discuss your individual eyewear needs

Follow up appointments by telephone where appropriate

Free in-house information on a host of subjects relating to your ocular health

Ability to access a second specialist appointment in any of the following area: Direct cataract referral, Diabetic screening, Dry eye consultation, Dilated retinal assessment and eyelash removal

This examination is offered to all patients on a private bases and the fee of £35 reflects the time and quality of the care provided to ensure total peace of mind
