

THE EXTENDED EYE EXAMINATION

This private 1-hour long consultation and discussion is a bespoke examination designed as an opportunity for those with a particular concern, or with special requirements. Additional discussion time, examination procedures, and a written report on your ocular health & prescription ensure total peace of mind.

THIS EXAMINATION IS PARTICULARLY SUITED TO THOSE

Who require a written report regarding their ocular health and prescription

Who may have a family history of inherited eye disease, and would like to be more informed about risk factors, and likelihood of onset

Those who have been recently diagnosed with an eye disease and would like to gain a better understanding of it

Those who simply prefer more time and a relaxed pace to the eye examination

Who have specific requirement for additional diagnostic procedures, such as dilated indirect headset ophthalmoscopy* or Goldmann tonometry*

Those who feel they have more challenging prescriptions or visual requirements

YOUR REPORT

All of the optometrist's examination findings

Colour photographs of your retina

Written advice regarding key points, prognosis and any action plans if appropriate

This service is offered to all patients on a private basis and the fee of £90 to reflect the additional time and quality of care provided ensuring you total peace of mind.

*These procedures are available included in the normal eye examination where indicated by
